1. I'd like to use webscraping tools to scrape data from NCES. They have the documentations on how to. used their API here: "https://data-nces.opendata.arcgis.com/pages/use-apis". I think that the fact that we learned about JSON and rvest will enable me to follow their instructions.

2. Q6-7

   df1 is a tibble (tbl_df), and df is apark type (tbl_spark)

   Q6-8

   - df1 has a dot as a separation link (ex. Sepal.Length)

   - df has a dash as a separation link (ex. Sepal_Length) The difference can be due to the class of each table
